MEMORANDUM

Re: Certification for Inspection and Testing of water based fire protection systems

Effective March 03, 2004, all persons engaged in the inspection and testing of automatic fire sprinkler systems must receive a certificate of registration from the State Fire Marshal's Office. To be registered, a person must pass the applicable examinations and must complete the manipulative skills task book(s).

The examinations will be given at the State Fire Marshal's Office on Thursdays. Depending upon the number of applicants that are interested, it could be every Thursday for the first few months. A private vendor is offering a four day class that will aide in preparing for the various certification levels of testing. The cost of this four-day seminar is \$400.00 dollars. If you are interested please contact this office for scheduling assistance and a copy of the course registration.

If there are questions concerning this new certification program, please contact this office for further information.

Sincerely,

A handwritten signature in black ink, reading "Michael Jenson".

Michael Jenson
Deputy State Fire Marshal
